Applicants' Amendment filed September 7, 2007 and Supplemental Response filed September 26, 2007 are acknowledged. Claim 31 is canceled. Claims 1-30 remain under consideration.

An Information Disclosure Statement filed September 14, 2007 is acknowledged and has been reviewed. Each reference must have a publication date.

Applicants' arguments have been fully considered and are persuasive in part. Rejections and objections not reiterated from previous Office Actions are hereby withdrawn. The following objections and rejection constitute the only objections and rejection presently applied to the instant claims.

In the last Office Action the disclosure was objected to for the following informality: Claim 2 is incomplete. The claim ends with "agent selected from the group consisting of: steroids, antibiotics,." It appears other agents were intended, or the term "and" should appear between the recited agents.

No response is noted, and the objection of record is maintained.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Claim 30 is drawn to a method of treating an inflammatory **gastrointestinal** condition. There is no antecedent basis in the specification for inflammatory diseases of the stomach, or any organ of the gastrointestinal tract, other than the colon.

Applicants' discussion in the Amendment filed September 14, 2007 directed to the filing of three terminal disclaimers is noted. However, regrettably, only the required fee for the filing of three terminal disclaimers is apparent to the Examiner. It appears the paperwork, if properly submitted, has not been scanned. Accordingly, Applicants are urged to file the three terminal disclaimers according to the proper procedure or to contact supervisory LIE Brenda Gray at telephone number 571-272-0528 for direction as to having the submitted paperwork scanned.

The rejection of claims 1-29 on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-5 of U.S. Patent No. 7,119,119 is maintained. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the patent are drawn to pharmaceutical compositions comprising the two therapeutic agents 4-aminophenylacetic acid and 5-aminosalicylic acid.

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this Final Action is set to expire **THREE MONTHS** from the mailing date of this Action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this Final Action and the Advisory Action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

shortened statutory period will expire on the date the Advisory Action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the Advisory Action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this Final Action.
